

1TREELLION GLOBAL FUND BECOME A SUSTAINABLE COMPANY, CREATE A STRONGER ENGAGEMENT

Would you like to be a sustainable company, one that your employees and customers will appreciate working with? By partnering with 1treellion, we can generate new and green incentive programs that will not only engage your team but also help the planting of forests in at-risk communities. We invite you to become a sustainable and forest-friendly company where your current and future employees and customers, feel appreciated and connected to a greater purpose.

Work with us

We provide your company with a program to lower your emission and have it as a sustainable and forest-friendly by planting trees on behalf of your employees. To do this, we ask for a donation from your employees, one your company will match.

There could also be a donation done in their name for planting of a forest in their honor. The forest can be planted in all of our existing communities.

Corporate Donation:

Empower your employees to raise funds to donate to 1treellion and offer to match their total amount raised. This way, your company will **DOUBLE** the number of trees you sponsor, and make your employees feel free and proud to directly support tree planting.

Matching donations through giving programs leads to more employee satisfaction. Employees who see company matches will see that your company cares about what they care. The majority of employees surveyed said it was important to them to work at a company like that. And 88% of business leaders believe employee engagement is central to attracting and retaining top talent. Happier employees are loyal employees, which minimizes employee churn and improves morale.

Your giving programs are more than mere fundraising, your matches are effective ways to build up the culture at your company. The corporate giving programs demonstrate that you don't just care, but you're willing to put down real money to support your employees' efforts. And this does not go unnoticed!

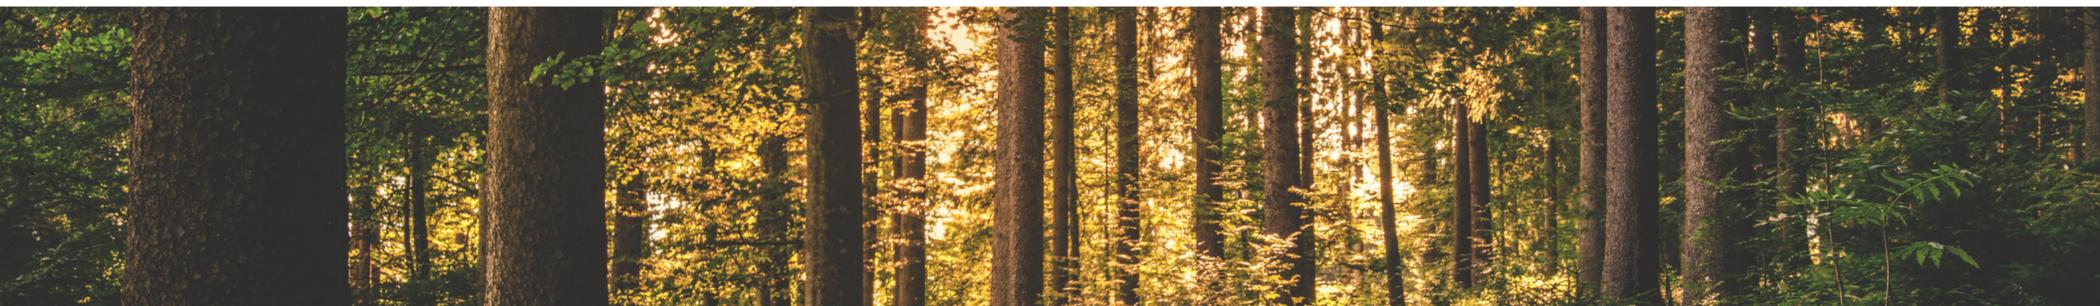

This is a tax-deductible expense for the new and green onboarding process.

YOUR EMPLOYEES WILL FEEL PROUD

The Expected Outcome

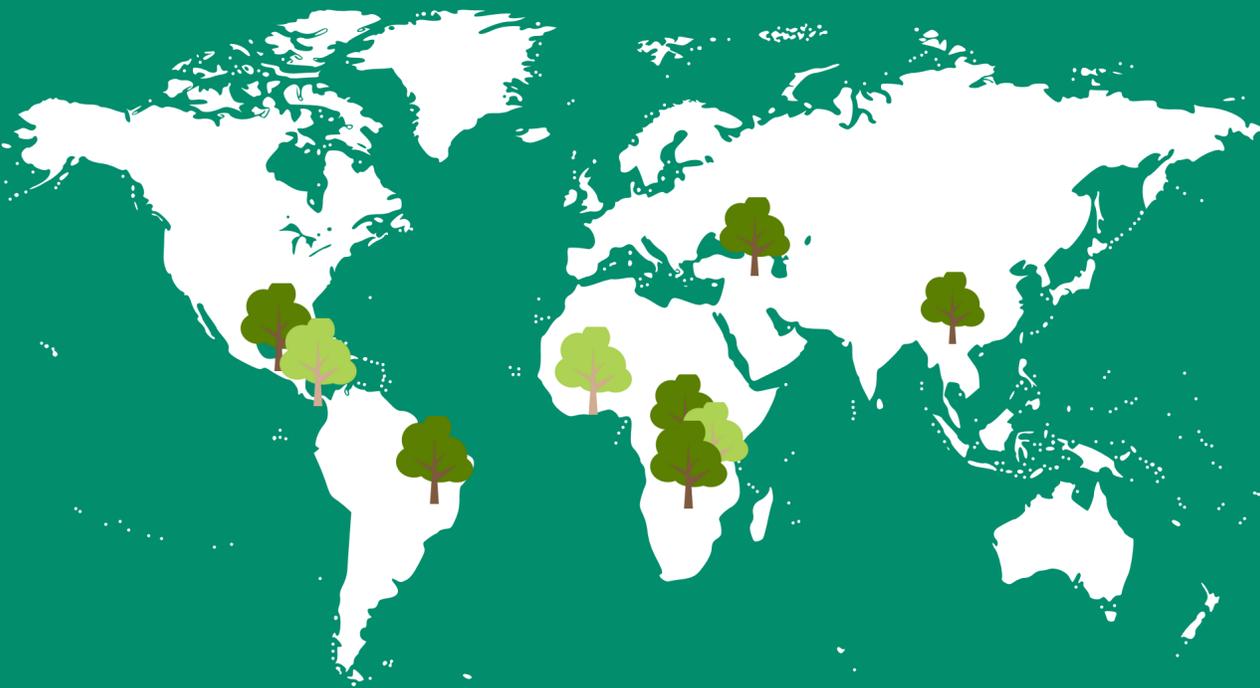

- ✔ Cause & Impact - Your high-tech company is now forest-friendly, providing low-tech solutions to climate change.
- ✔ Young Talent Acquisition - 60%+ of Millennials state that a "sense of purpose" is a key reason why they work for their current employers.
- ✔ Employee Engagement – 93% of employees surveyed want to work for a company that cares about them as an individual; 51% won't work for a company that doesn't have firm social and environmental commitments and 74% say their job is more fulfilling when they are provided opportunities to make a positive impact at work.
- ✔ Talent Retention - 88% say their job is more fulfilling when they are provided opportunities to make a positive impact on social and environmental issues.

1treellion Global Funds (aka 1treellion) is a non-profit 501(c) (3) project committed to funding tree planting with communities. We are a 100% volunteer-based organization. Our mission is to bring communities together to mitigate climate change by planting 1 trillion trees. [We find that planting trees is the most natural and efficient way to lower carbon emissions and restore ecological and social balance in communities.](#)

Our Projects

1treellion has 12 successful small-scale tree planting projects in 10 countries:

- Nicaragua, Brazil, Guatemala, Tanzania, Congo, Armenia, Kenya, Thailand, Uganda, and Ghana.
- 1treellion has funded the planting of 8673 trees between all our different project sites.
- 1treellion has been directly involved with 60,141 people and will indirectly impact thousands.
- The average survival rate of trees at our project sites is 80%.
 - The majority, of large-scale tree-planting projects, tend to fail, as their average tree survival rate is around 19%. "Typically only a minority of seedlings survive because many are left unattended, in part because ownership and management of trees is not handed over to local communities."
- We're more than happy to share more information about our projects, just ask!
